Career History:

Workplace: Clarksons Research	July 9, 2018 – August 9, 2019
Data Technician (Placement)	

I gained a years' experience of working in the shipping research industry as a Data Technician. I co-ordinated with offshore analysts in the preparation of raw data for their monthly publications with the use SQL Server queries, stored procedures and Excel spreadsheets.

I followed a strict monthly schedule as well as carrying out administrative operational tasks. I liaised closely with the sales and marketing team to update the website's shop products through a SQL server database and HTML.

I was fortunate to develop my skills using Visual Studio (in C#) and version control (GitHub repository). I worked on several internal projects within the development team to automate smaller tasks that involved Excel files and preparation of emails to clients, as well as existing ongoing projects.

Other Key Responsibilities:

- Corresponded with offshore brokers around the world on a monthly basis to collect rates
- Take minutes in the monthly team meetings
- At the last month of my placement I had the experience of handing over and teaching the next placement students
- Carry out tests for the web development team
