SKILLS

Programming Languages:
Java and C# – experience in HTML, CSS, JavaScript, Arduino, VBA and SQL.

Data Technology: SQL Server Management Studio.

Operating Systems: Windows, OSX and experience in Linux.

Development Tools: Git, GitHub, Eclips, Android Studio / Code and Arduino.

PROJECTS

Portable NFC Speaker:
University Final Year Project

An experimental prototype intended for Museums as an alternative to the current audio guide device; utilises NFC (Near Field Communication) technology – on the Arduino platform. Find out more here!

University Activity Tracker:
Personal Project

Currently I'm using an Excel spreadsheet to track my University hours. I'm in the process of turning it into an Android application. Written in Java! View Repository Here.
